Here is the screenshot of publishing data to IBM cloud and thus verifying it.

The screenshot displays the IBM Watson IoT Platform interface. The top navigation bar includes tabs for Browse, Action, Device Types, and Interfaces. A search bar is present, and an 'Add Device' button is in the top right. The main content area shows a list of devices with columns: Device ID, Status, Device Type, Class ID, Date Added, and Descriptive Location. Two devices are listed: Device ID 12 (Disconnected) and Device ID 22 (Connected). The 'Connected' device is expanded, showing a detailed view with tabs for Identity, Device Information, Recent Events, State, and Logs. The 'Recent Events' tab is active, displaying a table of live data streams from the device.
